

## CERAMITZ

Wall coating based on colored quartz sands

**Description** CERAMITZ is a decorative spray applied acrylic based coating containing colored quartz sands which can be applied to all types of interior and exterior wall surfaces. Particularly effective when high resistance to abrasion, shock and to stressing climatic cycles is required. With its natural matt effect, it's ideal for the protection and the decoration of external facades and interior areas where a faux stone effect is required. The product protects against water penetration whilst maintaining good moisture vapour transmission properties.

**Consumption rate** 3,0 Kg/m<sup>2</sup>

**Interiors / Exteriors** Interiors and Exteriors

## GRANIPLAST

Wall coating based on natural Italian marble chips

**Description** GRANIPLAST is a decorative trowel applied acrylic based coating containing graded natural Italian marble chips which can be applied to all types of interior and exterior wall surfaces including cement renders, lime cement mortars, Gypsum plaster, wall boards etc. The acrylic binder provides resistance to attack from acid gases contained in the atmosphere and also protects against water penetration. The product is easy to apply and has excellent adhesion properties. With the beauty and charm of natural marble stone, it is attractive both for the protection and the decoration of external facades and interior wall surfaces.

**Consumption rate** 4,5 Kg/m<sup>2</sup>

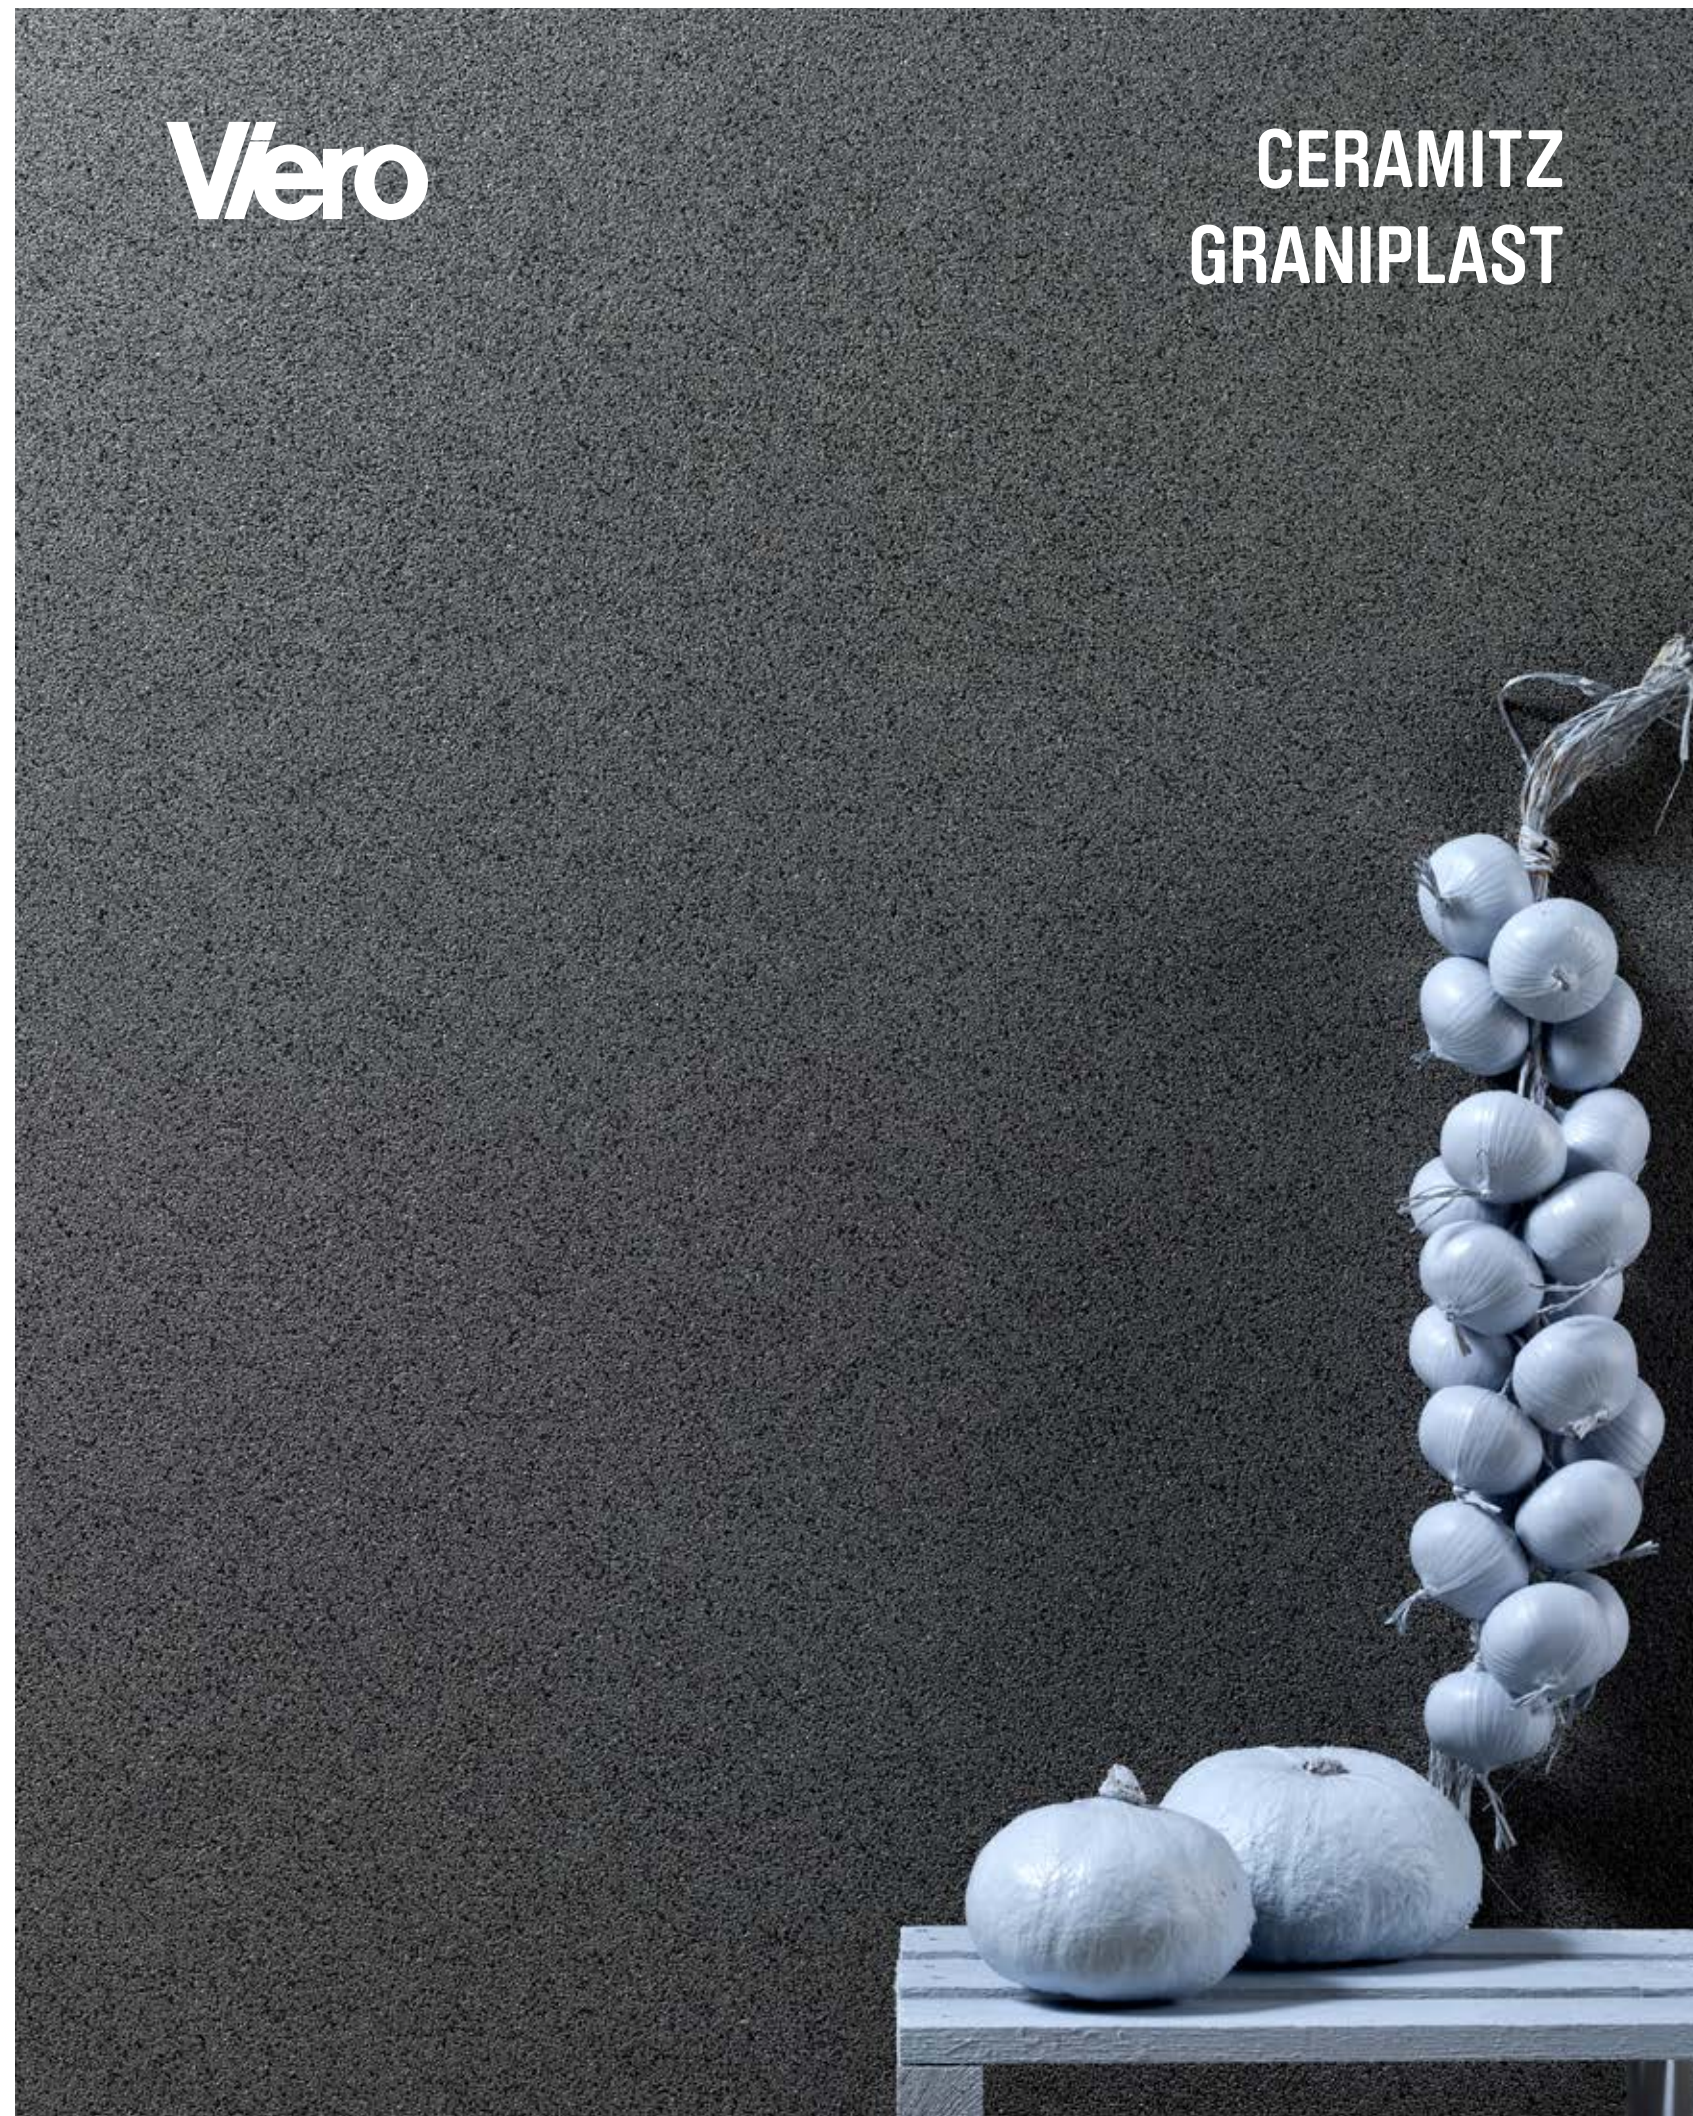

**Interiors / Exteriors** Interiors and Exteriors
